Owing to locomotive shortages lesser powered AB1501s with P2510 on Mt Gibson iron ore trains at Geraldton on 30 wagon shorter empty of various types of ore wagons climbs the grade at Mickos on 7th February,. Photo Phil Melling

---

Geraldton iron ore traffic is not spectacular like the Pilbara ore roads but this may change in the near future with Yilgarn Infrastructure that has Chinese backing offering to build a \$2billion 1500km line from Geraldton to near Wiluna and be completed by 2011. This project if it proceeded would be completed fully three years before the governments preferred tenderer Oakejee Port and Rail to develop these Mid West iron ore reserves.
