As this issue is being put together on December 24th, through comes the terrible news that 7MP5 has run into the rear of a loaded grain train around 2am at Jumperkine, in Perth’s Avon Valley, killing MP5’s driver. Our sincerest condolences go to the driver’s family, friends and colleagues at this very sad time.

Q4013 has been reactivated at Forrestfield in mid December, being used on trip trains over the following week or so.

Bushfires on the Trans-Australian rail line around the Zanthus-Goddards-Kitchener region for much of November and into early December disrupted transcontinental rail traffic for quite a few weeks. The line was closed for multiple short periods, and overnight on a couple of occasions – just long enough to throw most trains off their paths and cause many crewing issues.

The Esperance line was closed on a couple of occasions due to fires around Norseman, mostly only a day or so but the most recent in mid December (also involving a bad heat kink between Cowan and Higginsville during extreme heat) lasted a week. The Leonora line was also closed for a couple of days in mid December due to the heat.

A few late submittals for October to start this issue.

2K06 grain ex Brookton passes through York behind DBZs 2302, 2301 & 2305, 14th October.

DBZs 2302, 2301 & 2305 ease 2K06 grain through Kenwick, 14th October.
