IMPORTANT

Punctual Timekeeping is the Hallmark of Efficient SERVICE

ALWAYS PLAY YOUR PART

- Avoid unnecessary delays to trains at fixed signals. This is best achieved by placing signals at proceed, subject to safe working regulations, in ample time to obviate any risk of checks or blocks. Also ensure that signals are showing a clear indication.
- Stow brakevans correctly and prepare consignments enroute for prompt discharge at roadside stations.
- Avoid delays by efficient team work in loading and unloading brakevans. When this course will obviate delay, discharge consignments on to the platform instead of sorting the articles on to trollies.
- During periods of heavy traffic advise stations in advance where accommodation is available on trains. This is an important service to the public apart from minimising delays.
- When the length of the train is such that double stops might be incurred, direct roadside passengers to carriages toward the rear of the train; trainmen to be appropriately instructed.
- Always provide the most suitable carriage stock available, cleaned and fully serviced.

A copy of every new issue of the WORKING TIMETABLE BOOK, or section of the Book, or amendment thereto, is to be supplied to all concerned in accordance with Regulation 8.

It is imperative that each Stationmaster carefully check this Timetable, regarding the timing of trains, crossing arrangements, &c., insofar as his own station or the stations he supervises are concerned. He will be held responsible for promptly bringing under the notice of the Timetables Co-ordinator (Room 70A), and Metropolitan or District Superintendent, any inaccuracies that may appear herein.

WALL SHEET TIMETABLES issued in conjunction with this book, are to be posted in a prominent position at a height from the ground, and in the close proximity of a light, to enable passengers to consult it with facility. A red line must be ruled on each timetable under the name of the station concerned, and time applying to it.

PASSENGER, RAIL MOTOR, AND MIXED TRAIN RUNNING.—Depot stations must obtain full particulars from Guards of the late running of Passenger, Rail Motor, and Mixed trains. In the case of a Rail Motor run without a Guard, the necessary particulars shall be obtained from the Driver. In the event of any time being lost by the locomotive, the cause, also locomotive number and class, must be ascertained from the Driver, and the Train Controller advised. Drivers will require to explain the cause of any time lost that in the aggregate exceeds the time gained on the journey.

When a Passenger, Rail Motor, or Mixed train is blocked at a roadside station, the Train Controller must be advised by the Stationmaster at the station at which the block occurred, and if the train that caused the block was running late the cause of such late running (whether overtime in section or other cause) must be given if ascertainable.

SUBURBAN PASSENGERS NOT TO TRAVEL BY COUNTRY TRAINS.—Country trains including Rail Motor and Locomotive hauled Passenger Trains, shown in the Northern and Midland, Western and South Western, North Eastern and Eastern Working Timetable books are not available for inter-station passenger travel within the electrified Suburban area unless otherwise specified in the Timetable books referred to.

FAST NEWS-GOODS TRAINS.—Passengers must not be allowed to travel by the Fast News Goods trains, as set out hereunder, unless authorised by the Board or the Chief Traffic Manager.

Members of both Houses of the Federal and State Parliaments are, however, exempt from the fore-going prohibition and may be permitted to travel on these trains, as required.
The trains referred to are :—
1.30 a.m. (No. 15), Northern; 12.20 a.m. (Nos. 35 or 35A), and 1.10 a.m. (No. 113), Eastern.

SCHEDULED STOPPING ARRANGEMENTS FOR COUNTRY PASSENGER SERVICES.—The instructions regarding action to be taken by trainmen concerning "if required" stops when necessary for passenger purposes etc., are shown on page 268.

SALISBURY LOOP.

Working of Intermediate Electric Staff Instrument.

(a) An intermediate electric staff instrument as described in pages 545–546, General Appendix is provided in a cabin at the Down end of the Loop.
The instrument is auxiliary to the Electric Staff instrument in the Salisbury Loop Signal Box and is interconnected electrically with the Staff Instruments at Salisbury Loop Signal Box and Nhill, so that only one Staff can be withdrawn and when a staff has been withdrawn from one of the instruments all other staffs become secured in their respective instruments.

(b) When a Down train is signalled to the Departure Home Signal to cross an Up train, the Driver of the Down train must, immediately on arrival of the opposing train, proceed to the Auxiliary Cabin and be in readiness to withdraw a staff for his train.

(c) When an Up crossing train has arrived complete the Signalman Salisbury Loop must send the Train Arrival Signal to Nhill and after that signal has been acknowledged, must give the 4-3 bell signal. The Signalman at Nhill, if the Line be clear in accordance with Rule 4, must acknowledge the 4–3 and give permission for a Staff to be withdrawn. The Signalman at Salisbury Loop must then give two long rings on the telephone to the Driver at the Auxiliary Cabin and both Signalmen must hold down the bell keys until the Galvanometer needle of their instrument returns to the vertical position.

The Driver on receipt of the two long rings must raise and hold a Staff against the drum of the instrument. This will cause, the Galvanometer needles to deflect and when both needles are deflected in the same direction (to the right or left) the Staff may be withdrawn from the instrument. The driver must then turn the indicator hard over to the Staff out position and notify the Signalman, Salisbury Loop by telephone the number of the Staff withdrawn. Subject to the necessary Fixed Signal being at the proceed position, the train may then proceed on its journey.

(d) The door of the Auxiliary Cabin is secured with a 5P padlock. Drivers of all Down trains must be handed a 5P Key at Dimboola and the keys must be delivered by the Drivers to the Signalman at Serviceton. All Keys received at Serviceton must be returned to Dimboola each day.

(e) A Staff magazine is provided at Salisbury Loop for transferring Staffs to the Instrument at the Auxiliary Cabin and the Signalman, Salisbury Loop must ensure that a sufficient number of staffs is kept in the Auxiliary instrument.

(f) The instructions contained in Clause 7 (c) Page 549 General Appendix prescribing that a Proceed Order must not be issued whilst there is a staff for the section in an intermediate instrument, will not apply in regard to the Auxiliary Instrument at Salisbury Loop.

* Rail Motor Running Schedule based on train being non-stop at these stations.

METHOD OF NUMBERING TRAIN TIME-TABLES, ETC.

Down trains are given odd, and Up trains even numbers (Suburban Trains excepted).

The lines above the departure time and figures at the side indicate the station appointed for trains to meet or pass each other, also the numbers of the trains to be so met or passed.

For example, on page 24, appears the following :—

DOWN		No. 485 Express Goods
		a.m.
Lubeck	*arr.*	..
		–3, 130
	dep.	4 56

The above example indicates—

That number 485 (Down) meets number 130 (Up), and precedes number 3 Down.

Footnote references are indicated by Capital Letters **A, B, C,** etc., shown after the figures in Train Schedules such as 7.02E shown for No. 834 at Ballarat (Page 11).

LOADS OF GOODS TRAINS.

Schedule Loads.—The schedule loads laid down for Goods trains, on Broad-gauge lines, may be exceeded by six (6) tonnes when, by so doing, an extra vehicle can be despatched by a train which would otherwise be under the schedule load.

Parcels Coaches and Motor Coaches.—(*i*) When Parcels Coaches and Motor Coaches, except Nos. 113 "M" and 156 "M" are used for hauling Goods, Stock, the number of vehicles hauled must not exceed eight (8) including Brakevan. The vehicle limit for 113 "M" and 156 "M" is governed by the load set out in clause (*ii*).

(*ii*) The maximum tonnage for all Parcels Coaches and Motor Coaches (except as set out in clause (*iii*) must not exceed the following :—

Ruling Grade	Trailing Load	Ruling Grade	Trailing Load
Level	410 tonnes	1 In 50 ..	125 tonnes
1 In 200 ..	285 "	1 in 40 ..	100 "
1 In 100 ..	215 "	1 in 30 ..	70 "

(*iii*) When Motor Coaches Nos. 113 "M" or 156 "M" are used for shunting purposes in Jolimont Yards a maximum trailing load of 560 tonnes may be hauled.

Diesel Fordson Tractors.—Maximum load hauling or propelling on level is 230 tonnes. The maximum load on grades at a speed of 5 miles per hour is as follows; Grade 1 in 50, 30 tonnes: 1 in 75, 65 tonnes; 1 in 100, 85 tonnes; 1 in 110, 90 tonnes; 1 in 200, 150 tonnes. (See page 253).

LOCOMOTIVE RUNNING SCHEDULES.

The following instructions are applicable to the Loads and Locomotive Running Schedules published n the Working Time-tables:—

(a) *Goods Trains.*—The schedules for Goods trains represent the time necessary to run each section with the specified load under average conditions.

It will be the duty of the Driver to maintain the speed of his train as near to the maximum permissible speed as the load and grade will allow.

(b) *Through Goods Trains.*—The Locomotive Running Schedules for through Goods trains are based on the Loads which a Locomotive can haul over the Ruling Grade between recognized Terminal Stations and provide for these trains stopping at certain stations, viz:—
Recognized Terminal Stations. Stations where trains have to stop to Test Brakes.
Stations where Locomotive Power is changed.

Should the train stop at any other station *en route*, an allowance of two (2) minutes over and above the Through schedule is to be allowed at each such station where the train stops.

The Running Schedules for Through Goods trains, except where schedules applicable to special loads are provided, are based on the Ruling Grade Loads between the recognized Terminal Stations shown hereunder :—

(c) *Roadside Goods Trains.*—The Locomotive Running schedules for Roadside Goods Trains are based on the Sectional Loads and proportions of those Loads, and provide for trains stopping at all stations.

Light Locomotives.—(i) The running schedule for a "Light" Locomotive, or "Light" Locomotives attached or in either case with only a Brakevan attached, shall (subject to the Instructions on pages 236 to 253), be equal to the schedule for the fastest stopping Passenger or Mixed train, as the case may be, for the section over which the locomotive runs, unless a special schedule is issued to the contrary.

See page 251 for speed of light locomotives.

(ii) In every case where a brakevan is attached to the locomotive or locomotives, the train must be signalled as a "through" Goods Train; but before sending the "Is Line Clear" Signal, each Signalman must inform the Signalman in advance, by telephone that the train consists of a Locomotive (or Locomotives) and brakevan.

NOTES.

(*d*) For Goods trains only, subject to dividing train at board 181 miles 70 chains and the observance of the following instructions :—

(i) The Driver must be in possession of the train Staff for the Section Koroit—Penshurst.

(ii) The load is to be divided at 181 miles 70 chains, at which point a "White Diamond Board" is provided. The train must be brought to a stand with the locomotive opposite the Board' when the Guard must secure the rear portion, and uncouple the front portion and accompany it to Woolsthorpe. After sunset or in foggy weather, a Red Light must be placed on the front vehicle of the rear portion of the train left on the Main line. As soon as the frontportion has been drawn sufficiently far forward, the Guard must place two detonators ten (10) yards apart upon the line about 200 yards from the front vehicle of the rear portion to notify the Driver, when returning, of the position of the remainder of the train.

(iii) On arrival at Woolsthorpe with the front portion, the Driver must retain possession of the Staff and may return for the rear portion, accompanied by the Guard.

(iv) Should the locomotive become disabled after leaving the rear portion, assistance is to be obtained in accordance with the Train Staff and Ticket Rules. The Guard must arrange to protect the obstruction in the opposite direction to that in which the Fireman has proceeded.

(*h*) Assisted in the rear to Stop-board near 226¼ miles. See page 256.

(*m*) Loads of Goods trains between Warrnambool and Dennington without a brakevan attached to the train are shown on page 226.

SPEED OF LOCOMOTIVES OR TRAINS, CLASSES OF LOCOMOTIVES ALLOWED TO RUN ON VARIOUS LINES, AND LOCOMOTIVE AXLE LOADS

SPEED OF LOCOMOTIVES OR TRAINS.

1. The **maximum** speed is the **highest speed allowed** on any portion of the Line.

2. **Speed of trains.**—It must be clearly understood by Enginemen, Electric Train Drivers, Rail Motor Drivers, and Guards, that the maximum permissible speed authorized for the Line and for the type of train, must not, under any circumstances, be exceeded over any portion of the journey. In any instance where the times shown in the Working Time-table to run any section conflict with the maximum permissible speed authorized for that particular section, or with any safe working or other instruction, the Time-tables are not to be adhered to, and the matter is to be promptly reported to the Manager, Passenger Operations and Metropolitan or District Superintendent by Station-masters and others engaged in Train Running. Drivers to bring the matter under the notice of any Superior Officer, who must report the matter to his Superintendent, and in addition forward a copy of his report directto the Manager, Passenger Operations.

3. The maximum speeds laid down in respect to the various Lines, or portions of Lines, are subject to :—

(i) the provisions of Regulation 59 ;
(ii) the special speeds shown on pages 239 to 253 inclusive ;
(iii) such **temporary** speed reductions as are shown from time to time in the Weekly Notice or other Printed or Written Instructions, and
(iv) the special speeds laid down in clause 7 hereunder, and clause 8, page 237.

4. (i) Victorian bogie goods vehicles having "P" as the last letter for their classification may be attached to passenger trains and, except in the case of "ZP" brakevans, run at the speeds laid down for passenger trains. Express Goods or Mixed trains consisting solely of bogie passenger vehicles (except suburban motors) and or Victorian bogie goods vehicles having the letter "P", "F" or "X" as the last letter of their classification, with the exception of loaded Tank Wagons classed "TWF" or "TWX" may run at speeds laid down for Express Goods trains. The maximum speed for "ZP" brakevans and Tank Wagons classed "TWF" or "TWX" is laid down in Special Rates of Speed, clause 4, page 250.

(ii) When any goods vehicle, including "Z" and "ZL" brakevans, without "P", "F" or "X" as the last letter of classification is attached to any train, the goods train speed laid down for the various lines must not be exceeded without the special authority of the Chief Mechanical Engineer.

(iii) It will be the duty of the Guard to inform the Driver at the commencing point of the train of the Maximum Speed allowed due to the classes of vehicles included in the train and the Driver or Guard, if relieved, must pass this information on to his relief.

5. Drivers, Firemen, and Guards must keep a good look-out for hand signals, which will be exhibited at the various localities where **temporary** speed reductions are in force in accordance with the Regulations. It must, however, be understood that repairs to lines may be necessary at other places besides those mentioned in the Weekly Notice or other printed or written instructions, and of which, owing to their urgency, it has not been possible to give previous notice. Drivers must, therefore, be always on the look-out, and be prepared to **stop or run at reduced speed** whenever and wherever hand signals are exhibited. (See General Appendix respecting Special Permanent Way Signals.)

6. **Stationmasters, Signalmen, Guards, Gangers and others must promptly report through their superior officer any case in which a train runs in excess of the speed laid down and such report must be forwarded to the Head of the Branch without delay.**

7. **Maximum Speeds for Trains Hauled by Certain Classes of Locomotives**—The maximum speeds permissible on any Line for various classes of Locomotives with train attached, are shown hereunder:—

Class	Miles per Hour	Class	Miles per Hour	Class	Miles per Hour
		F (Diesel Electric	20	W (Diesel Hydraulic)	20
B (Diesel Electric)	70	H (Diesel Electric)	45	X (Diesel Electric)	70
		J (Steam)	50		60
D3 (Steam)	50	K (Steam)	50		
		L (Electric)	70	Y (Diesel Electric)	40
		R (Steam)	60	NA (Narrow Gauge) (Steam)	20
		S (See note 3) (Diesel Electric)	70		
E Electric 1102–1111	40	T (Diesel Electric)	60		

Note 1.—The maximum speeds laid down for Locomotives in clause 7 hereof are subject to the maximum speeds laid down in respect to various Lines or portions of Lines and to the conditions imposed above and also on pages 197 and 237 to 252.

Note 2.—See page 250 for speed of a Locomotive or Locomotives with a brakevan of fixed-wheel base only attached and for speed of light Locomotives.

Note 3.—The maximum speed for trains hauled by "S" Class Diesel Electric Locomotives when Hostler's End leading is 30 M.P.H. and when Hostler's End leading in Station Yards is 10 M.P.H. Set back movements when driven from Hostler's End are not permitted.

8. **Maximum Speeds for Rail Motor Trains.**—The maximum speeds permissible on any Line or Rail Motor trains are as shown hereunder :—

Rail Motor Trains	Maximum Speeds † m.p.h.
Diesel Electric Rail Motors	60
Diesel Rail Car (Walker type) 102 H.P.	45 } See footnote
" " " " " " " .. ..(No. 4)	50

	50 (with trailer)
Diesel Rail Cars 600 H.P. (Air-conditioned) .. .. (Nos. 40, 41)	70

† See Clauses 3 and 4, page 236.

Note.—(a) Although passenger trains are permitted to run over certain lines at 70 miles per hour, the maximum speed of any passenger train hauling a Diesel Electric Rail Motor must not exceed 60 miles per hour. However, the 600 H.P. Diesel Rail Cars may be hauled at 70 miles for hour.

(b) The maximum speeds shown above for Rail Motor Trains are subject to the Maximum Speeds laid down for Passenger Trains for the line or portion of the line over which the Rail Motor is running and to the conditions imposed hereunder and on pages 236 to 252 inclusive.

Where any goods vehicle is attached the speed laid down on pages 250 and 251 for the type of vehicles concerned must not be exceeded.

CLASSES OF LOCOMOTIVES ALLOWED TO RUN ON VARIOUS LINES

Except where otherwise provided, the following are the particulars of the classes of Locomotives that are allowed to run over the various broad-gauge Lines. The words "**and lighter**" in respect of some Lines or portion of Lines mean Locomotives of a lighter axle load than the class specified. (See instruction, page 66 of Working Time-Table Addenda for Locomotive axle loads.)

1. Except where instructions to the contrary are in force the classes of Locomotives allowed to run on any particular Line, or portion of a Line, may also be worked on any siding connected therewith.

2. In a case of special emergency, the District Engineer may authorize the running, for one return trip, of a heavier class of Locomotive (excluding "B" and heavier classes) than specified for a particular Line.

3. (a) On the Branch Lines specified hereunder, Locomotives of a heavier axle load than those ordinarily authorized on pages 239 to 248 to run over such Branch Line, may, when necessary for shunting purposes, and subject to Block Working Rules, be placed on the Branch Line at the station named; in every such case the speed specified herein for the local movement on the Branch Line must not be exceeded. See also clause (b).

SPECIAL SPEEDS

The maximum Speeds laid down in clauses 1, 2, 3, and 4 hereof are subject to the Maximum Speeds laid down in respect of the various Lines or portions of Lines and to—

(i) the provisions of Regulation 59;

(ii) such **temporary** *speed reductions as are shown from time to time in the "Weekly Notice" or other printed, or written instructions; and*

(iii) the Special Speeds laid down in clauses 7 and 8, pages 236, 237.

1. Curves:—(a) Every curve, with the exception of those referred to in clause 2 hereof, that is of such radius as to render necessary any modification of the foregoing speeds, is indicated by a **curve board** (see diagram in margin) placed on the left-hand side of the line at the entrance to the curve. The number shown on the Curve Board indicates, **in miles per hour the maximum speed** allowed when going round the curve. It is pointed at one end, and is so placed that the pointed end indicates the direction of the curve, right-hand or left-hand, as the case may be. The speed must be reduced before the locomotive or train enters on the curve, and the indicated speed must not be exceeded until the whole of the train is clear of the curve.

(*b*) The following tables give respectively the maximum speeds around curves of certain radii on suburban Lines, and on all other Lines. These speeds are indicated on the Curve Boards.

LIGHTING OF COUNTRY TRAINS

These arrangements are based on the **scheduled times of trains and average weather conditions. In the event of late running, exceptionally dull weather, or trains being docked in close proximity to verandahs, etc., Stationmasters, Guards and Conductors must vary the arrangements as circumstances require.** When non-vestibuled carriages are in use on the Main Line Trains, it may become necessary to depart from the following instructions, and in such instances, Stationmasters, Guards and Conductors will require to suitably arrange for the lighting of such carriages at a convenient station.

Economy must be exercised in the use of electric lights in carriages, as serious damage, very costly to repair, occurs when the batteries become exhausted through the lights being allowed to burn unnecessarily at stations. A three-position switch is provided, viz.: "Off", "Half", and "Full Light".

See General Appendix, pages 419 and 420, for instructions regarding electrically-lighted carriages and brakevans.

(a) LIGHTING OF TRAINS WHEN PASSING THROUGH TUNNELS.

On trains which have to pass through tunnels and on which a conductor is not employed, the carriages must also be illuminated, but as considerable delay would be involved in lighting and extinguishing the lights at stopping stations on either side of the tunnels, arrangements are to be made for them to run with lights reduced, i.e., on half-lights. The lights must be lit and extinguished as indicated hereunder:—

ress, Passenger, Rail Motor and Mixed trains must stop at stations where so scheduled in the Time-tables. Where the times of arrival and departure of trains are not both stated, the times shown are of those of departure from stations.

Where the time for the train is shown without the addition of one of the undermentioned symbols or other special reference, a definite stop must be made.

Where the following standard symbols, viz., *, ‡, §, ¶, ††, and Z are utilized with or without, as the case may be, a time being shown, they indicate how the train shall be dealt with at the particular station or stations, i.e., whether non-stop, or to stop in certain circumstances.

The symbols referred to and their application to the time-tables are as follows:—

‡ Indicates that the trains shall only require to stop at the station concerned in the following circumstances:—

(1) When signalled from the station to stop, indicating that there are passengers to be entrained.

(2) And/or when the train is conveying passengers for the station. The Guard is responsible for informing the Driver that there are passengers to be detrained. If no Conductor on the train, the Guard must make the necessary inquiries among the passengers at the previous stopping station. If no Guard be employed on a rail motor, the Driver must make the necessary inquiries.

* Trains will not stop to pick up or set down passengers at stations where the train schedule is marked thus*, or where this symbol occurs without an accompanying time.

§ Indicates that the train shall only require to stop at the station concerned in the following circumstances:—

(1) When signalled from the station to stop, indicating that there are passengers, vangoods and/or mails to be entrained.

(2) And/or when the train is conveying passengers, vangoods or mails for the station. The Guard is responsible for informing the Driver that there are passengers, vangoods, or mails to be discharged. If no Conductor on train, the Guard must make the necessary inquiries among the passengers at the previous stopping station. If no Guard be employed on a Rail Motor, the Driver must make the necessary inquiries.

¶ Indicates that the train will only stop if required to pick up passengers, vangoods and/or mails. Necessary signal to be exhibited when the trains are required to stop.

†† Trains to stop to set down, if required, but not to pick up passengers at stations where the train time-table is marked thus ††. Passengers desiring to alight must give notice to the Conductor at the previous stopping station, where Conductors must also inquire. On trains which have no Conductors, the Guard will be responsible for this duty. If no Guard be employed on a Rail Motor, the Driver must make the necessary inquiries. The Guard is responsible for informing the Driver that there are passengers to be detrained.

Z. Indicates that the train will stop at the Rail Motor Stopping Place concerned, for passengers only, in the following circumstances:—

(1) When signalled from the Stopping Place to stop, indicating that passengers are to be entrained.

(2) And/or when the train is conveying passengers for the Stopping Place. The Guard is responsible for informing the Driver that there are passengers to be detrained. If the train is a Rail Motor, and no Guard is employed, the Rail Motor Driver must make the necessary inquiries among the Passengers.

‡ Trains marked ‡ run only if required. Special advice will be issued by the Chief Traffic Manager, Metropolitan or District Superintendent, or Depot Stations when the running of such trains is necessary.

● Indicates that the train must when practicable be despatched from the station concerned at the earlier time shown.
